**Lab under
construction**

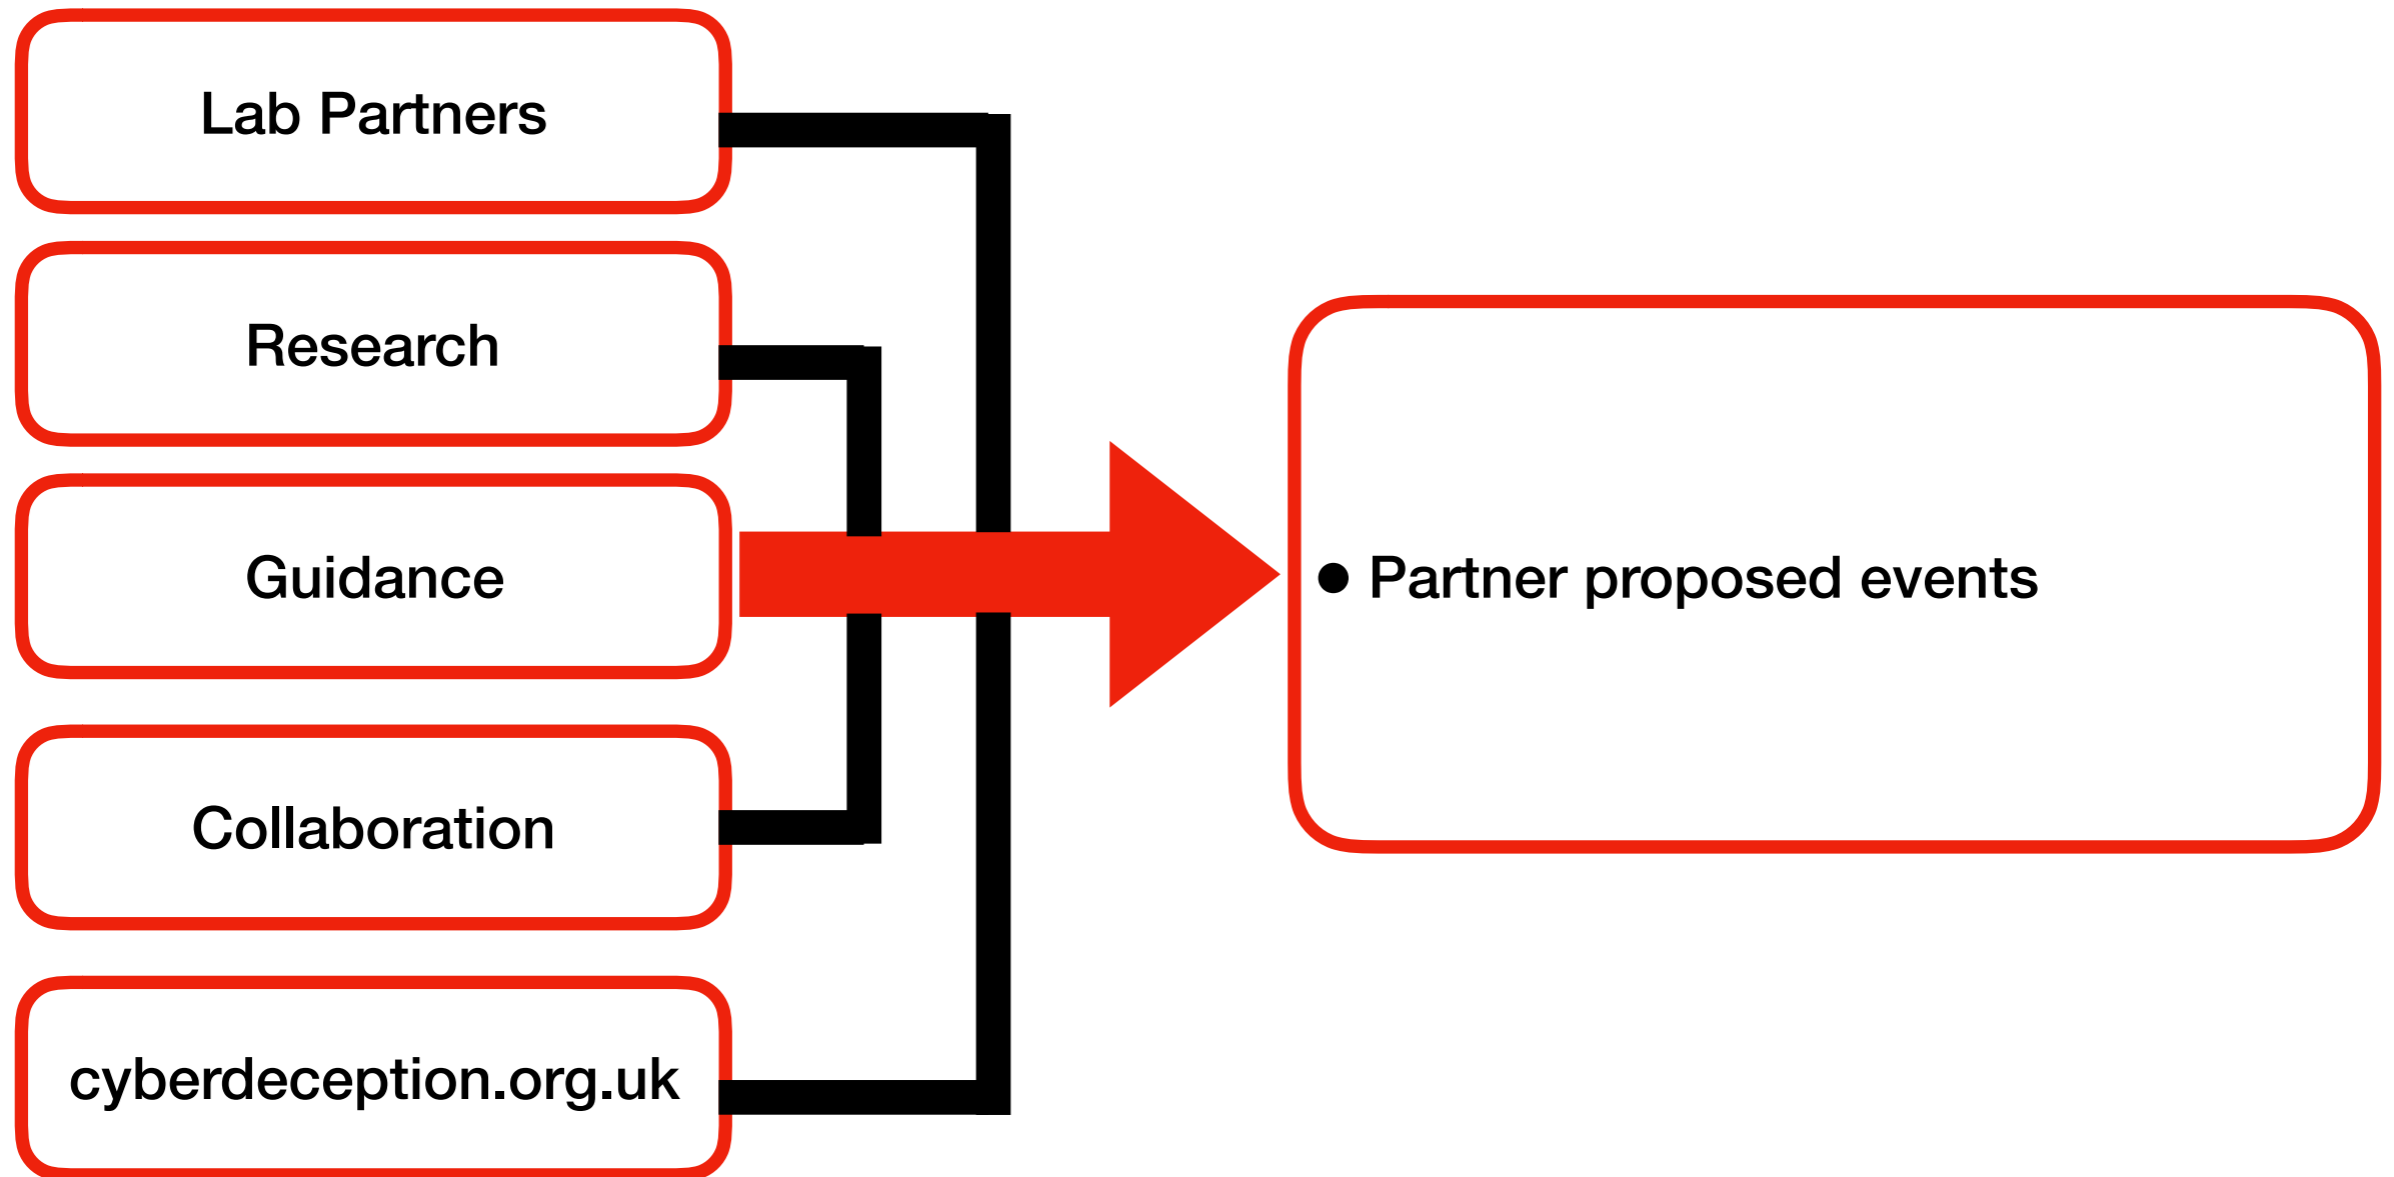

Launching Autumn 2019

- Primary portal into the lab community.
- Opportunity for Lab Partners to publish current research objectives and findings.
- Links to live research, opportunities to contribute to experiments.
- Future intent is to house and curate a peer reviewed e-journal for Cyber Deception.

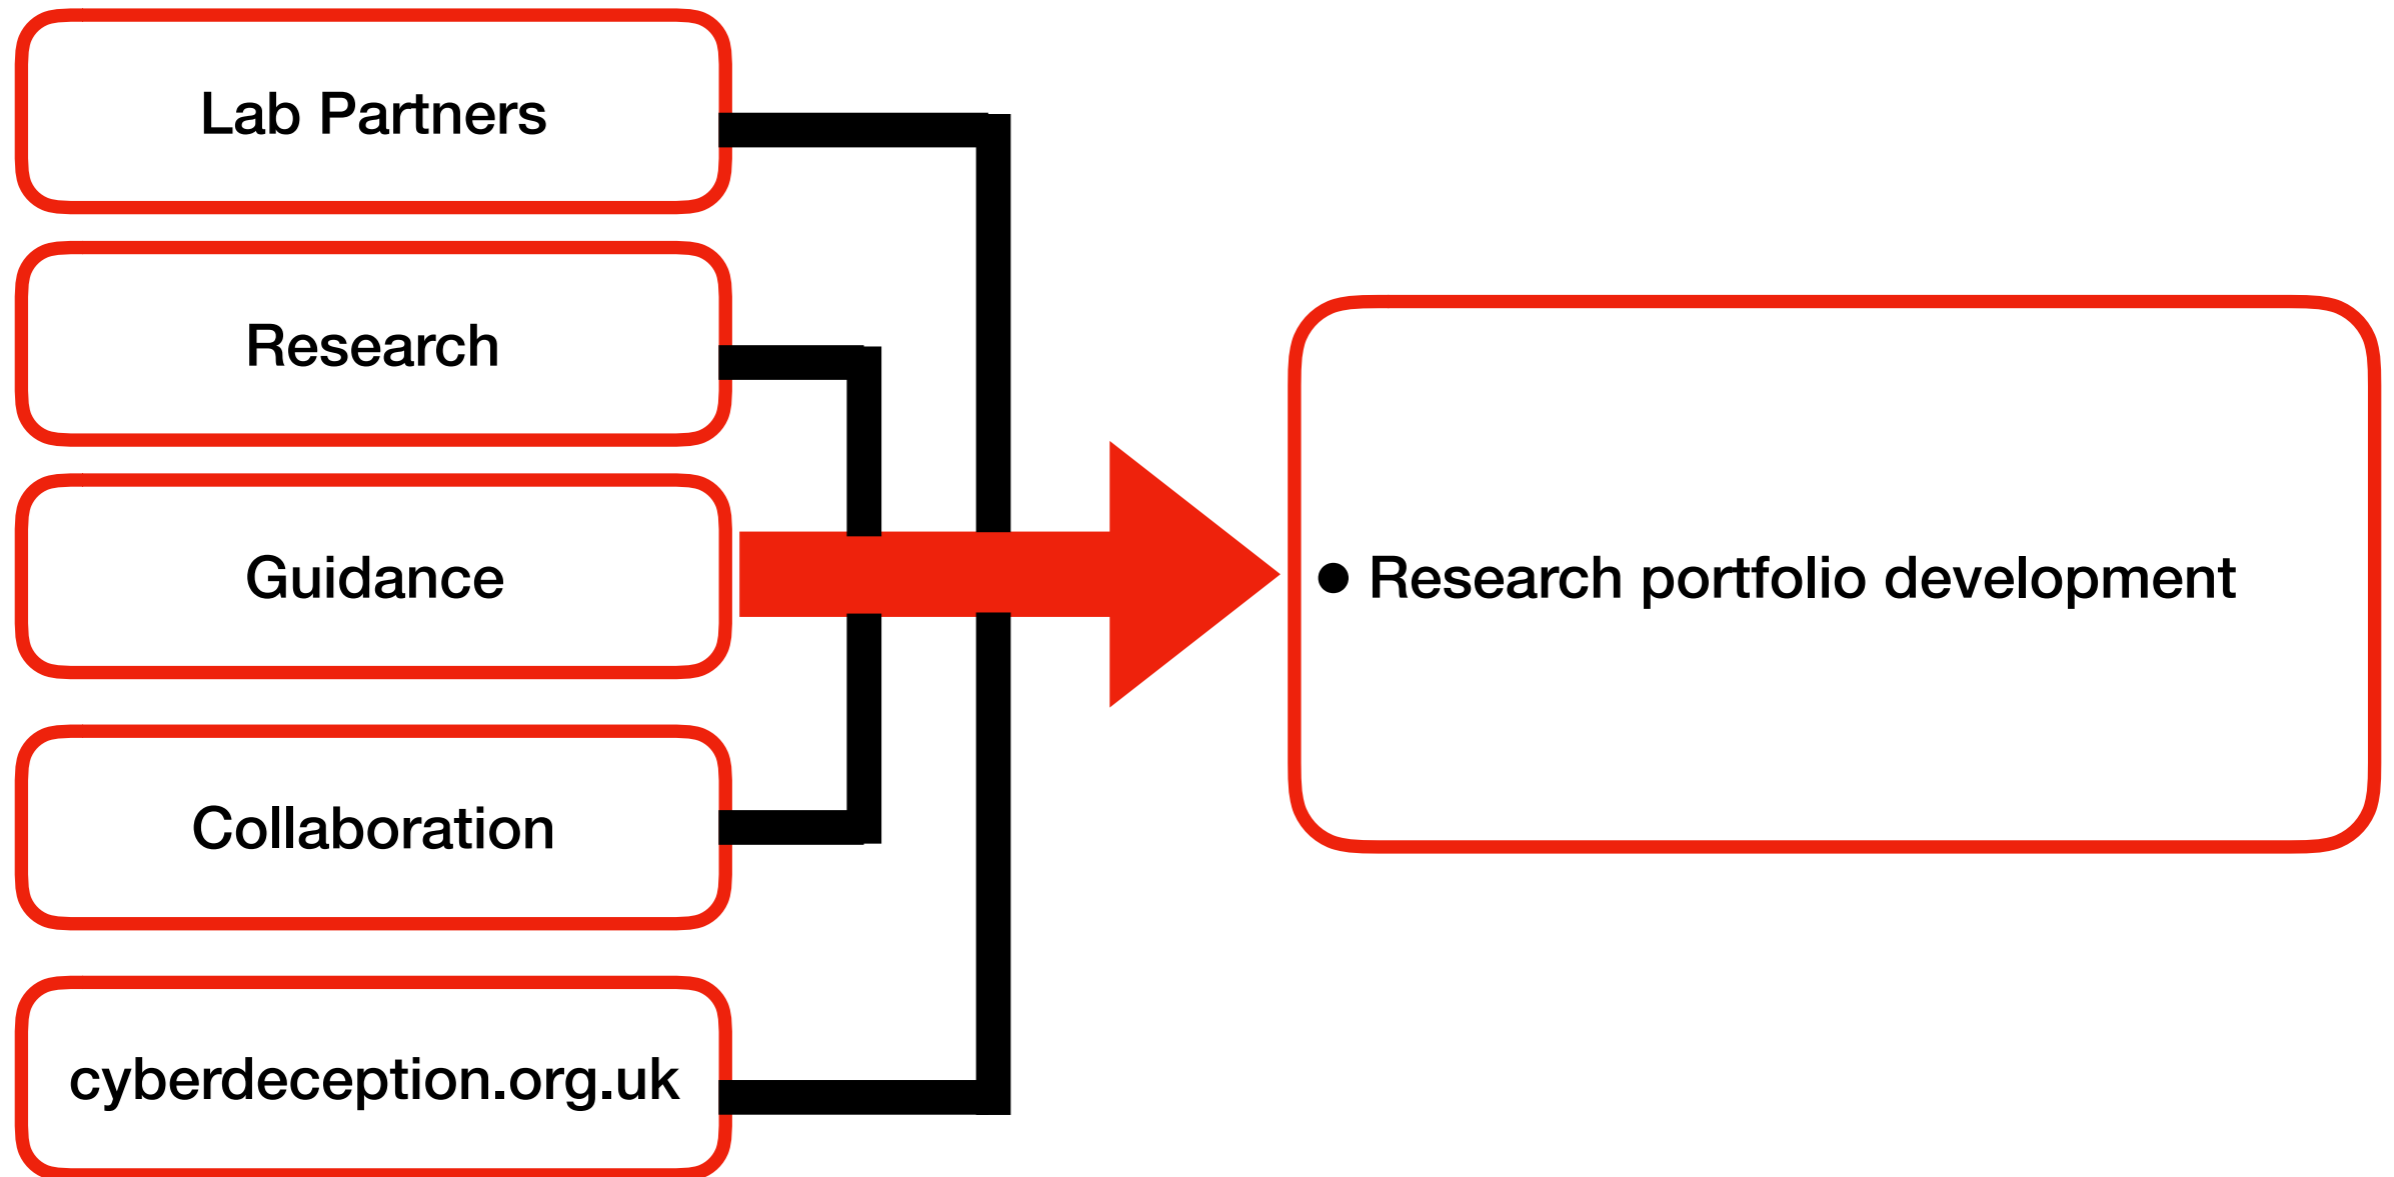

GOAL to become the nexus for Cyber Deception in proactive cyber defence

Some Upcoming Events

- 1 Day Event - “Legalities of Cyber Deception” (late FY19/20)
- 1 Day Event - “What is a Defensive Payload?” (early FY20/21)
- 1 Day Event - “Deception in the Cyber Supply Chain” (FY20/21)
- National Cyber Deception Symposium (October 2020)

Warfare in the Information Age

- The need to defend against the unprecedented
- The reality of likely defeat when defending of our home territory
- The need to change the rules of combat and to realise the costs and sacrifices that cannot be avoided in our attempts to fight back within our home territory

This is the real 'Warfare in the Information Age'

Thoughts for Today

- Adversarial Behaviour Change without the traditional reliance on kinetic force
- Cyber domain provides a new dimension through which to shape adversary's sensemaking
- Cyber capabilities not tied to traditional physical considerations
- Virtual violence in network defence
- Our own networks become a killing ground for our attackers

NCDL to pioneer efforts to manipulate our adversaries' behaviour in the home territory of our networks

Questions?

info@cyberdeception.org.uk

Closing Remarks

- Digitally Based Warfare
- Warfare in Our Home Territory
- Turning Our Networks into Digital Killing Grounds
- Warfare is about achieving outcomes (at a cost) rather than not getting caught
- Cyber provides opportunities to manipulate attacker's reality
- Virtual violence in network defence
- This the real 'Robot Wars' for grown-ups
